Good music, nice hand drawn art, an alright story and some great music to go along with it. I felt like all the characters had some type of personality to them and it was always a highlight to explore new areas. However there is alot of backtracking with i personally don't mind an well without spoiling anything, a glitched final boss fight.

Also just a long shot here but does anyone know how to get the "widget" i got everything in the game besides it and the wiki gave me vague info. If you know how to get it PLEASE tell me in detail. thak you.. Critical Mass is a match-four puzzler where players place different colored cubes in a three-dimensional space. The player must eliminate all cubes in the game area before reaching "critical mass". Scoring combos will reduce the critical mass level and buy the player some time.

This game features several play modes. Classic proceeds through several levels of predefined shapes with randomized arrangements. Rush requires the player to remove all the blocks while the score decreases. Survival requires the player to stave off critical mass for a set period of time. Meditation gives the player a set number of blocks to remove with no time limit or failure conditions.

As far as gameplay goes, scoring a combo does have a good feel to it and the game itself is reasonably polished, however this game fails to get my recommendation. Firstly, the since the game involves a three-dimensional shape, the gameplay often devolves to a guessing game where the player may (or may not) get lucky by placing a cube on a hidden vein of like colored consecutive blocks. Secondly this game's music is quite literally a 10 second, rather generic, clip on loop. Meditation features a different 10 second clip but the rest are the same. Lumines, another match-four puzzle game, changes the visual style and music as the player progresses which keeps things fresh and interesting.

To it's merit the game can be played with just the mouse, so if you're looking for a game that can be played with one hand (maybe with a beer in the other hand). Also the developers were thoughtful enough to include a colorblind mode which adds a symbol to each block.

Score: 5/10. Best trade simulation i ever play, but have some problem in latest windows. and save file cannot snyc with steam cloud. but still i love this game!. 10V10 would pick up socks again. Just gave Infinite Space III a shot last night and wound up playing several hours. Even in its early release status, the game is fun, and the variations thrown by the RNG keep even the (somewhat small) range of encounters varied. I have enjoyed the heck out of it so far, and absolutely cannot wait to see what the devs do next.

From my experience, this aircraft takes a lot of dedication to master. The throttle is very slow to act, and it's very easy to stall after takeoff. The seating position is awkward, with having to tilt your screen down each time you want to see the instruments, taking focus away from the outside. This aircraft has NO lights other than instrument lights, so get used to flying in the dark. Virtual cockpit button use is average, with a good amount of switches and buttons being toggleable. If you're willing to put in the effort to tame it and get the blue note, I wouldn't recommend it.. It's anime Souls, but with a few big differences. The controls are not souls so you may find yourself opening your map more than you'd like. They also can't be changed. The characters are not customizable, which is a shame, because there's a real need for fashion in anime souls. Early access, though, so I'm hopeful. Good fun and challenging.. You won't regret buying this XD. Aesthetics!

. I'd honestly love to give this game a good review. It's a lot of things I love: cooperative, creepy, weird, etc, but I can't because I'm never able to play it, which in turn is due to no one ever being on. I waited for almost 20 minutes, and nobody ever joined the lobby. Maybe my internet is just terrible, I don't know. However, when I get a chance, I will give this game a fair review. But, for now, I can't recommend this.. Where else can you pound Finnish metal music while hucking a giant sky-whale helicopter into a hot LZ, spitting fire in three directions, to pull out wounded friendlies while your comrades blitz the ground around you so you can bug out with your precious cargo? Some of the gnarliest, most rewarding, absolutely heroic co-op I've ever played anywhere. What do we say to the god of death? Not today!. should have read the comments. the description needs to be changed. There is no game.. To: Public users of the game (Valve : and chairman welcome to the meeting everyone)

SOMETHING LIKE THIS COULD BE USEFUL ONE DAY . SOMETHING LIKE THAT ALSO ;=()>

The game Second Coming will be out of beta next week!:

The game Second Coming will be out of beta next week, so get ready for version 1.0 and more news on how we will continue to build great content after launch!

<https://youtu.be/RPW0VYYDBXs>. **Episode 2 is Live!:**

Episode 2 has been live since a week ago. The Early Access now include 10 levels and several changes has been introduced. Movement steps in top-down has been increased.

There will be additional bug-fix release of what we got so far this or next week. We are also gearing up for Episode 3, which will be level 12-20.

Apart from that, we will also update the demo in the near future (which is old compared to the early access build) and we aim to release the Early Access version as well.

. A little about the game:

THE GAME

The game Second Coming and the short story Second Coming: Serpent Zero will let you discover and explore our unique origins (of life) and a universe much larger, older and grander than ourselves. At the end of the road, there will be unexpected answers to age old questions. The story takes as its standpoint that consciousness precedes the universe that we see. It is a very Biocentric worldview as outlined by Robert Lanza. Biocentrism argues that the primacy of consciousness features in the work of Descartes, Kant, Leibniz, Berkeley, Schopenhauer, and Bergson. It sees this as supporting the central claim that what we call space and time are forms of animal sense perception, rather than external physical objects. The story will explore what this would really mean for life as we know it, and also introduce aliens of different factions as the Nephilim's of ancient writings. The various Alien Factions all have their unique storyline, that is intertwined to the creation of men.

THE GAME MECHANICS

I have always loved XCOM: s style of strategic gameplay (both newer and older versions). The Game Second Coming will use a gameplay that will build on this great foundation, but focus also on story through cinematics, cartoons and even reading and intertwine this with the strategic gameplay. Using the elements, we all love too create a great gaming experience. The experience will intermix XCOM with rpg-, adventure and gamebook games.

News about coming release:

The game will soon go into Early Access, where we are going to add Episodes until all the episodes of the full game is included. The game will then be released as a full game.

If you choose to participate into the Early Access, you will receive all episodes up to the full game.. **Demo Update and Coming Early Access:**

We have updated the demo with bug fixes, inventory functionality and updated versions of the music tracks. We are going to release an Early Access version soon, where we will release the game in chunks until the full game is out. This is so that it can be tested by the public in an early stage.. **Beta 1.6 released:**

Been a couple of betas now, we are currently at Beta 1.6. Very close to final release. There will be more content coming after release from early access as well.
